Distances between Stations in the same Town or between Stations serving the same Places.

The following list gives the distances to or from Stations between which passengers may wish to make a change which cannot be effected by the medium of the railway itself. Special attention is given to cases of converging routes possessing no junction, the nearest points of convergance being carefully indicated:—

Distances between two Stations of the same Company and between which a Service of Trains is established (to be found in the body of the Guide), as Edinburgh (Waverley) and Edinburgh (Haymarket), are *not given.* Nor has it been possible to include many hundreds of distances between Stations in large cities and urban districts, such distances being matters of purely local interest.

In places where more than one Station exists, and where no information appears below, it must be understood that the Stations are either—

(1) Absolutely contiguous, as Evesham (G. W.) and Evesham (L M S);
(2) Practically contiguous, as Gloucester (G. W.) and Gloucester (L M S); or
(3) Within 2 or 3 minutes' walk as Oxford (G. W.) and Oxford (L M S).
